Anki Deck Creator: how it is put together

Creates Anki decks (.apkg files) from a plain text file of flashcards, plus three small helper scripts that query a running Anki instance through the AnkiConnect add-on.

sketched from the files, K

Anki Deck Creator: the run, Step by Step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

Product map: what Anki Deck Creator is for

WHAT IT IS

Creates Anki decks (.apkg files) from a plain text file of flashcards, plus three small helper scripts that query a running Anki instance through the AnkiConnect add-on.

WHAT GOES IN

The files at the top of the tree: flashcards.txt, anki-gen.py, all_notes.py.

WHAT COMES OUT

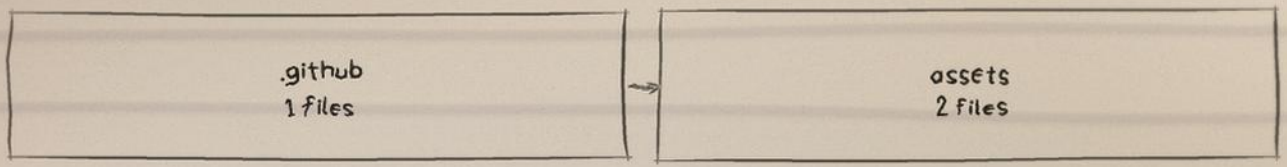

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, 

Anki Deck Creator: the parts and their jobs

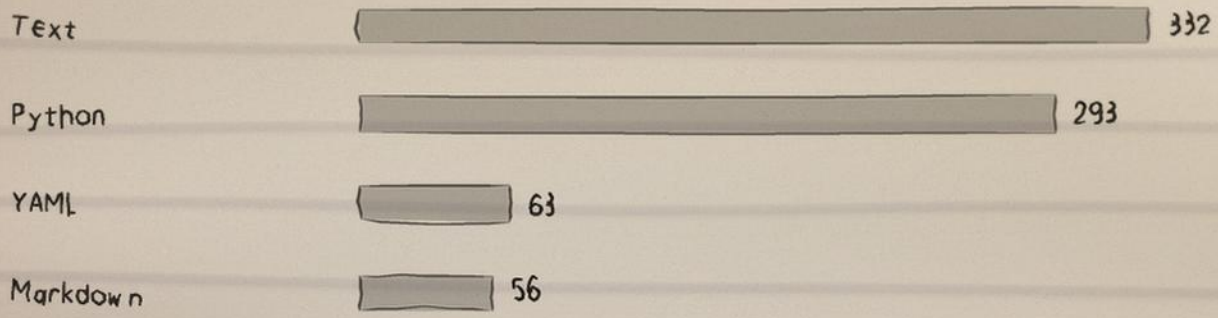

Each part is a folder or a file that is really in the tree.
If a part is only a name in the README, it is not drawn here.

second sheet,

Anki Deck Creator in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

11 files in the tree.
57 commits, first 2024-10-19, last 2026-10-30, from the local git log.
No test files by name in this snapshot.

counted and drawn, GK

Anki Deck Creator: schematic of the apparatus

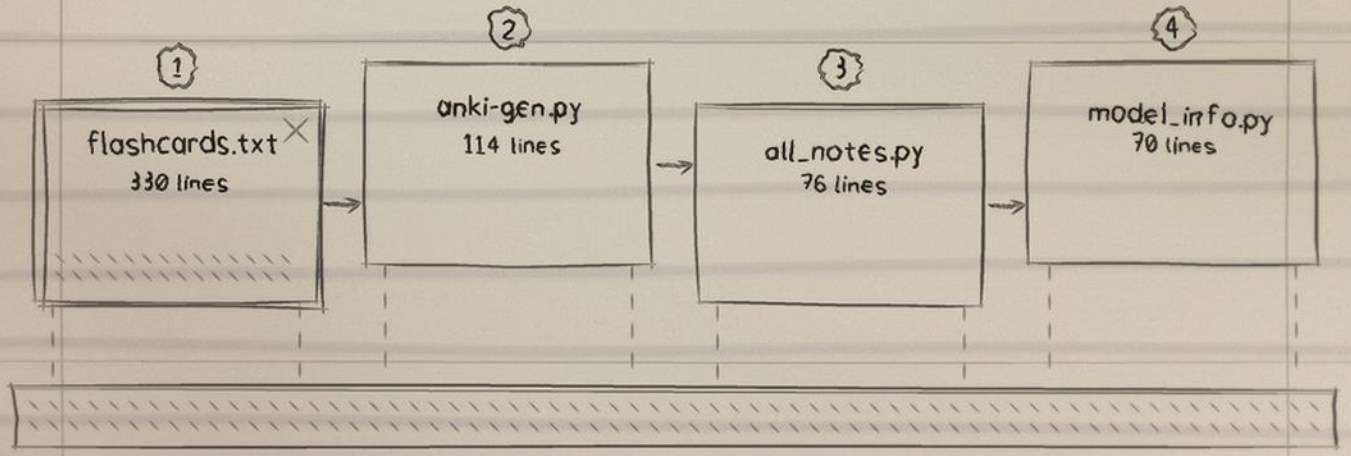

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. flashcards.txt
2. anki-gen.py
3. all_notes.py
4. model_info.py

in flow order, first to last
housed in: .github, assets

base plate: the repo itself, sectioned

span: 11 files, 744 lines counted

measured in the code: port 8765 (all_notes.py); port 8765 (model_info.py)

turns of the crank so far: 57 commits, 2024-10-19 to 2026-10-30

measured and sketched, GK
